

Panther Rehab Rounds

Grand Rounds Lecture Series

NERVE-BASED PROCEDURES: EXPANDING THE SURGICAL TOOLBOX IN UPPER AND LOWER EXTREMITY SPASTICITY

Presented by: **Kitty Wu, MD**

in conjunction with the UPMC Department of Plastic Surgery

March 11, 2026 | 7:00am | Biomedical Science Tower 1 (BST)

Room S100A 200 Lothrop Street, Pittsburgh, 15261

Kitty Y. Wu, M.D., MSc, FRCSC, is a hand and reconstructive surgeon with a specific interest in the functional reconstruction of upper extremity injuries. Her diverse training background, in the fields of Plastic, Orthopedic, and Neurosurgery, allows her to provide comprehensive care to patients with complex clinical problems from a unique perspective. Her specific areas of interest include: upper extremity reconstruction in adult and pediatric patients with cervical spinal cord injuries; and surgical management of spasticity following spinal cord or brain injuries (stroke, cerebral palsy, trauma related). Dr. Wu is a candidate member of the American Society for Surgery of the Hand (ASSH), American Association for Hand Surgery (AAHS), American Society for Peripheral Nerve Surgery (ASPN), American College of Surgeons (ACS), and Canadian Society for Plastic Surgery (CSPS). She is an active member of the Royal College of Surgeons and Physicians of Canada.
