"Artificial intelligence in physical medicine and rehabilitation"

Presented by:
Daniel Herman, MD, PhD
Assistant Professor
Department of Orthopaedics and Rehabilitation
University of Florida

August 18, 2021
7:00am

Dr. Herman obtained his MD and PhD (Biomechanical Engineering) from the University of North Carolina at Chapel Hill, after which he completed his residency training in Physical Medicine and Rehabilitation at the University of Virginia and his fellowship training in Primary Care Sports Medicine at the University of Florida. He maintains a clinical practice in musculoskeletal sports medicine and sports concussion, and performs an array of ultrasound-guided procedures. His main research interests are in the association between sports biomechanics and injury risk, as well as the effect of baseline neurocognition and sports concussion on biomechanics and injury risk. Dr. Herman has received several grants for research in this area, and his work has been recognized with numerous awards, including the American Medical Society for Sports Medicine’s NCAA Research Award and the American Orthopedic Society for Sports Medicine’s O’Donaghue and Excellence in Research awards.

We welcome anyone interested to attend Panther Rehab Rounds. For information, or if you have special needs, contact Jessa Darwin (jcd79@pitt.edu), Dept. of PM&R.

The University of Pittsburgh School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to sponsor continuing education for physicians. The University of Pittsburgh School of Medicine designates this educational activity for a maximum of one (1) category 1 credit toward the AMA Physician’s Recognition Award. Each physician should claim only those credits that they actually spent in the educational activity.
