UPMC Children’s Hospital of Pittsburgh is ranked #9 on U.S. News and World Report Best Children’s Hospital Honor Roll.
Overview
Fellowship training is centered at UPMC Children's Hospital of Pittsburgh (CHP), a level 1 trauma center and home to the Children's Hospital Rehabilitation Unit (CHRU).

Fellows rotate through a comprehensive and well-rounded 2-year curriculum that provides the education and experience needed to practice as a pediatric physiatrist. The curriculum includes:
- Pediatric rehabilitation consults
- Inpatient comprehensive pediatric rehabilitation
- Outpatient PRM clinics
- Rehabilitation procedures
- General pediatrics
- Quality improvement
- Research

In addition to clinical and research activities, fellows will volunteer at Camp Inspire, a camp for children using ventilators. This opportunity teaches fellows through exposure to the lives of these special children. Fellows usually attend during their 2nd year.

Research and Quality Improvement
Fellows participate in a 1-month research rotation early in the 1st year to establish their research interests and have weekly protected time for research through the fellowship.

Inpatient Experiences
Our fellows experience inpatient pediatric rehabilitation at the CHRU, an 8-bed acute inpatient pediatric rehabilitation unit with 24-unit nursing and physician coverage. A wide range of inpatient referrals include patients with acquired brain injury, spinal cord injury, and rare disorders, as well as patients who are status post-transplant.

PRM physicians lead a team consisting of both therapeutic and supportive services including physical therapy, occupational therapy, speech therapy, therapeutic recreation, behavioral psychology, neuropsychology, social work, and child education.

Fellows also gain experience on our busy pediatric rehabilitation medicine consultative service at CHP, where we assist our colleagues in evaluating acute care needs and planning for post-acute care rehabilitation needs.

Outpatient Experiences
PRM fellows will participate in patient-centered multi-disciplinary outpatient clinics and programs including:
- Cerebral Palsy & Related Disorders Clinic
- Spina Bifida Clinic
- Acquired Brain Injury Clinic
- Muscular Dystrophy Clinic
- Spasticity/Movement Disorder Clinic
- Chronic Pain Clinic
- Brachial Plexus Clinic
- Community Outreach Experiences
- Feeding and Swallowing Clinic
- Durable Medical Equipment Clinic

Fellows also participate in:
- PRM Procedures Clinic (Botox/EMG/nerve block trigger points)
- Fellows' Clinic (Weekly dedicated clinic to follow patient throughout their fellowship. The fellows' clinic has alternating attendings for exposure to different practice styles.)
- Baclofen Pump Clinic (Fellow rotate with neurosurgery and gain experience with refilling and managing intrathecal baclofen pumps.)

Our Fellows are also exposed to (or participate in) Acupuncture, Ultrasound, and Adaptive Sports. The 2nd Friday afternoon of every month is dedicated for all clinical staff to gather for a faculty meeting, CHRU process improvement meeting, didactic presentations, and a journal club.
