

Participants needed to take a brief 10–15-minute survey for a NEW research study on adaptive video gaming! Participants will have the chance to get one of four \$25 Amazon gift cards.

Description of the study and benefits of participation:

This study aims to determine whether participation in adaptive video gaming has a positive association with employment for individuals living with physical disabilities. Participants in the study will have a chance to get one of four \$25 Amazon gift cards.

To qualify you must:

- (1) be 18 years of age or older.
- (2) be living with a physical disability.
- (3) currently be using adaptive video gaming equipment or adaptations to play video games.
- (4) have been using your adaptive gaming equipment for at least six months.

Participation involves:

Taking part in a brief 10–15-minute survey (link below) and answering questions related to demographics, gaming habits, and employment.

How to participate:

You may [click the link below](#) which will take you directly to the survey.
